MOMENTUM

SPRING PROMOTION 2026

PRECISION > POWER > PROGRESS

Welcome to Momentum

For over 120 years, CK Tools has understood one fundamental truth about trade professionals: when you're in your rhythm, nothing should slow you down. Since 1904, we've been engineering tools that keep you moving forward, job after job, day after day.

We know that February marks a turning point in your calendar. Winter's slower pace gives way to spring's surge. Projects that were paused come back to life. New contracts start landing. The phone rings more often. This is your season to build momentum – and we want to make sure you have the tools to capitalise on it.

That's why this year's promotion is called Momentum. It's about equipping you now, before the rush fully hits, with over 190 quality products at exceptional prices. Whether you're restocking essentials worn down from constant use, adding to your kit for larger upcoming projects, or finally investing in that tool you've had your eye on – this is your moment.

We've spent the past century listening to professionals on site, understanding what makes your day easier and what holds you back. Every tool in this brochure has been engineered to deliver the performance, durability and reliability you need when work is flowing and there's no time for setbacks. Because we know that once you hit your stride, the right tools don't just work – they disappear into the job, letting you focus on what matters.

Spring is here. The work is building. Let's make sure your toolkit is ready to match the pace.

Let's build momentum together.

Japanese steel blades are widely regarded as superior due to their exceptionally refined carbon steel alloys and precise heat-treatment processes, which deliver outstanding hardness, edge retention and wear resistance.

This same steel heritage—famously trusted in high-performance chef's knives—ensures consistently sharp, durable cutting edges designed for professional, long-term use.

COMPLETE SECURITY AT HEIGHTS

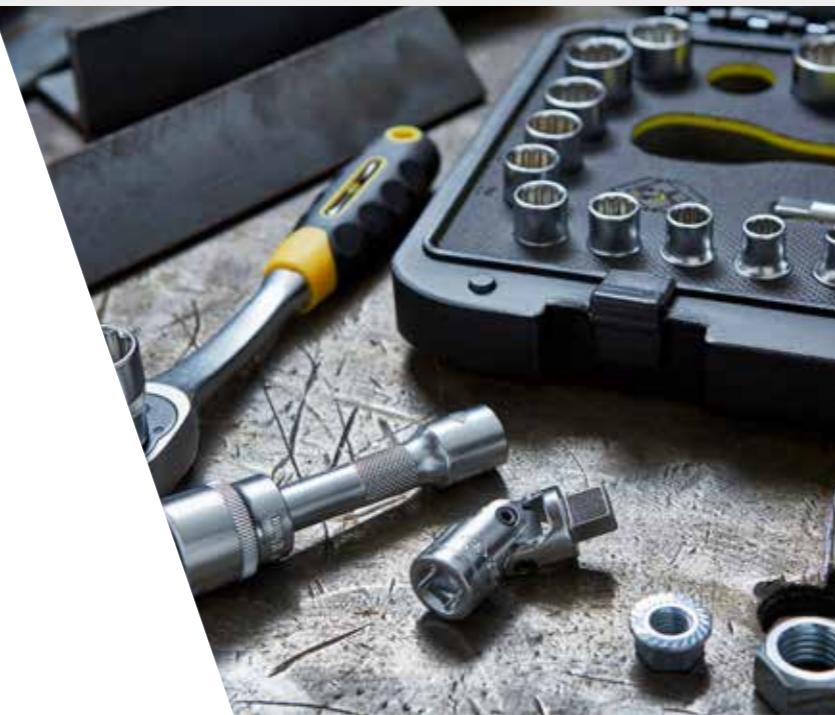

Designed for professionals who work where safety comes first. This comprehensive range combines strength, comfort and reliability to deliver dependable performance and protection in every working environment.

SURE-DRIVE

C.K Sure-Drive is designed for professionals who need dependable strength and control when working with fasteners day in, day out.

Built from heavy-duty chrome vanadium steel, the Sure-Drive system applies torque to the flat of the nut rather than the corners, helping to reduce rounding-off and deliver confident, consistent performance—even in tight or demanding working conditions.
